	Examiner John S. Maples	Art Unit 1745	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1745

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The expression "labyrinth-like outlet channels" in lines 5-6 of claim 1 is unclear because it is not known what is encompassed by such language.

In line 7 of claim 1, "the lower part is cut through in the area of the upper part" is incorrect. It is not understood how the lower part can be cut through the area of the upper part in the claimed battery. The lower part is distinguished from the upper part. Clarification is required.

Claims 2-12, dependent on claim 1, fall therewith.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-12, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by EP-523,273. ('273)

Reference is made to page 1 of the present application for the disclosure of the '273 patent along with all of the drawing figures in '273. As noted, the battery in '273 includes a cover with an upper part and a lower part where there are a plurality of mazes with cavities for acid deposition. The cover includes channel walls, ribs and webs between the upper part and the

Art Unit: 1745

lower part and the battery includes a degassing system as claimed. Figure 6 of '273 depicts the inclined outlet channels.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Both Fritts et al. and Geibl et al. disclose various batteries with upper and lower parts of a battery cover of interest.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Friday from 6:15-3:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
